RE: #ORD009227398

Dear Mr. Johnston:

As you requested, we have reviewed the material sent to this office under your cover letter of September 28, 1982. These materials were compared with the Federal requirements for Part B applications. The attached comments discuss completeness as if a formal Part B completeness review had been conducted.

Also enclosed is a Part B checklist which cites the regulations applicable to the Part B application. It has been annotated to show where specific requirements are applicable to different types of facilities. Anything marked "general", "container", or "tank" would be applicable to your facility. You may also wish to use the "model" RCRA permit application which has been enclosed as an example of the level of detail we would need to develop a permit.

If you have any questions on the comments enclosed, or if you need more information, please call Carrie Adams of this office at (206) 442-2806.

Sincerely,

George Hofer, Chief
RCRA Compliance & Permits Section
